DETAILED ACTION

I. Preliminary Matters:

(a) Applicants response of 10/14/2003 has been received and entered into the file.

- Claim 1 has been cancelled.
- Claims 12-19 have been newly added.
- Claims 2-4 and 6-19 are pending.

II. Remarks:

(a) Restriction/Election: Applicants traversed the restriction requirement based on the technical

features being

and thus this feature

would provide a contribution over the art and hence the claims would have unity of invention.

The examiner respectfully disagrees. The technical features are those that can be taken as a whole that are in common among all the groups. Instantly, those technical features are

, which was known in the art prior to the filing of the instant

application. Therefore, the inventions as grouped lack unity of invention and the restriction as outlined is proper and maintained.

In a telephone conversation with Mr. Harmuth, the traversal as to the restriction was withdrawn.

(b) Objections:

Art Unit: 1626

- (i) Applicants have amended claims 2 and 3 to overcome the objections cited against said claims.
- (ii) Applicants have amended claims 2-3 and 6-10 to limit said claims to the elected subject matter, therefore, the objection to these claims has been withdrawn.

III. Examiner's Amendment:

An examiner's amendment to the claims is attached to the instant office action which cancels claims 12-19. Applicants representative Mr. Raymond Harmuth provided permission to amend the claims.

IV. Reasons for Allowance:

Claims 2-4 and 6-11 relate to compounds according to formula I in claim 2. The closest art of record, WO 99/07697 does not teach or fairly suggest the substituents at the R1 position or the substituents on the Z moiety as instantly claimed. Therefore, claims 2-4 and 6-11, renumbered 1-9 are allowed.
